

ARVIN M. CAPARROS

SOFTWARE & AUTOMATION ENGINEER | POWER PLATFORM | .NET | SQL SERVER

Santo Tomas, Batangas, Philippines | 0963-016-8963 | arvinmcaparros@gmail.com | linkedin.com/in/arvin-caparros

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience developing enterprise applications, workflow automation, database-driven systems, and business-process solutions across the full software development lifecycle. Experienced in C#, .NET/ASP.NET Core, Microsoft SQL Server, REST API integration, React, and Vue, with hands-on experience using Microsoft Power Platform, including Power Apps, Power Automate, and Dataverse, for internal business-process automation. Proven experience developing approval workflows, role-based applications, automated notifications, reporting solutions, and manufacturing systems. Strong background in relational data modelling, SQL optimization, requirements analysis, testing, deployment, and production support.

TECHNICAL SKILLS

Microsoft Power Platform: Power Apps, Power Automate, Dataverse, Approvals, Solutions

Languages: C#, JavaScript, TypeScript, SQL, HTML, CSS, Python (working knowledge)

Frameworks & Development: ASP.NET Core, MVC, WinForms, React.js, Vue.js, FastAPI

Databases & Data: Microsoft SQL Server, PostgreSQL, MySQL, relational database design, data modelling, stored procedures, views, query optimization

Automation & Integration: Power Automate, REST APIs, RPA tools, workflow automation, approval workflows, email notifications, API integration

Analytics: Tableau; Power BI (learning/development)

Tools & Platforms: Git, GitLab, Postman, Swagger, SourceTree

AI-Assisted Development: Claude Code, OpenAI Codex, AI-assisted development workflows

PROFESSIONAL EXPERIENCE

Software Engineer

Apr 2026 - Present

Uni-President Information Philippines Corporation

Develop and maintain enterprise AI-enabled business applications using React, Vue, and TypeScript, collaborating with developers, QA engineers, and product managers throughout development, testing, and feature delivery.

- Serve as the assigned frontend developer for an AI Assistant module, developing conversational interfaces, conversation management, streaming-response handling, model and persona configuration, file attachments, workspace integration, and CMS connectivity.
- Develop frontend capabilities for an AI-powered multi-agent platform, including agent configuration, sub-agent workflows, file handling, and interactive workflow features.
- Develop knowledge-management interfaces supporting file management, folder navigation, role-based permissions, search, filtering, and external connection management.
- Enhance workflow-management capabilities including validation, draft autosave, publishing behavior, loading states, and protection against unsaved changes.
- Integrate enterprise frontend applications with REST and streaming APIs, coordinating request payloads, sessions, validation, and error handling with backend developers.
- Diagnose and resolve production defects, API-integration issues, race conditions, and application state-management problems.
- Collaborate with developers, QA engineers, and product managers through requirements clarification, code reviews, testing, and feature validation.

Full Stack .NET Developer

Jan 2022 - Apr 2026

Brother Industries (Philippines) Inc.

Designed, developed, deployed, and maintained enterprise desktop, web, and automation solutions for manufacturing operations, approval processes, reporting, and data-management workflows using .NET, SQL Server, Microsoft Power Platform, and RPA tools.

- Used Microsoft Power Apps and Dataverse for internal business-process solutions and structured operational data management.
- Built and maintained Power Automate workflows for business-process automation, approvals, notifications, and data-driven processes.
- Developed approval and workflow solutions integrating business rules, role-based access, automated notifications, and operational data.
- Parts Control System - Developed an ASP.NET Core MVC business application supporting parts tracking, quality-control monitoring, multilevel approval workflows, file management, transaction history, automated email notifications, and operational reporting.
- Man-Hour Management System - Developed a C# WinForms application supporting man-hour loss and COPQ management, role-based approval workflows, automated notifications, Excel data processing, SQL Server reporting, and Tableau analytics.
- Japanese Meal Reservation System - Developed an ASP.NET Core MVC employee reservation and administration system supporting advance and bulk booking, order monitoring, monthly reporting, and integration between PostgreSQL and SQL Server employee data.
- Container Management System - Developed C# WinForms and ASP.NET Core modules supporting container movement, logistics statuses, warehouse inventory, shipping documents, finished-goods planning, reporting, document management, and administrative workflows.
- Designed and optimized Microsoft SQL Server stored procedures, views, and complex queries to improve enterprise reporting performance and data reliability.
- Automated manual Excel extraction and system-upload processes using RPA tools, reducing repetitive user activities.
- Designed and maintained relational database structures supporting manufacturing and operational business processes.
- Gathered requirements from business users and translated operational requirements into technical solutions.
- Supported application testing, production deployment, enhancement releases, troubleshooting, and ongoing production support.

ADDITIONAL EXPERIENCE

Graphic Designer

Mar 2021 - Sep 2021

Arneth Agri-organics Inc.

- Produced visual content and marketing collateral to support brand and product communications.

EDUCATION

Bachelor of Science in Industrial Technology, Major in Computer Technology

Southern Luzon State University | 2014 - 2018
