

ARVIN M. CAPARROS

AI & AUTOMATION ENGINEER | AI SYSTEMS | WORKFLOW AUTOMATION | API INTEGRATION

Santo Tomas, Batangas, Philippines | 0963-016-8963 | arvinmcaparros@gmail.com | linkedin.com/in/arvin-caparros | arvincaparros-portfolio.vercel.app

PROFESSIONAL SUMMARY

AI & Automation Engineer with 4+ years of software engineering experience building enterprise applications, business-process automations, API integrations, and AI-enabled systems. Hands-on experience developing AI Assistant and multi-agent capabilities, integrating REST and streaming APIs, and building automated workflows using n8n, Microsoft Power Automate, Power Apps, Dataverse, and RPA tools. Strong software development foundation in C#, .NET/ASP.NET Core, TypeScript, React, SQL Server, and working knowledge of Python/FastAPI. Experienced in translating business processes into reliable technical solutions, troubleshooting system integrations, and delivering applications from requirements through deployment and production support.

TECHNICAL SKILLS

AI & Intelligent Systems: AI Assistants, Multi-Agent Systems, LLM Integration, Prompt Engineering, AI-Assisted Workflows, Claude Code, OpenAI Codex

Workflow Automation: n8n, Microsoft Power Automate, Power Apps, Dataverse, Approvals, RPA Tools, Business Process Automation

APIs & Integration: REST APIs, Streaming APIs, Webhooks, JSON, API Integration, Postman, Swagger

Languages: C#, JavaScript, TypeScript, SQL, HTML, CSS, Python (working knowledge)

Frameworks & Development: ASP.NET Core, MVC, FastAPI, React.js, Vue.js, WinForms

Databases & Data: SQL Server, PostgreSQL, MySQL, Relational Data Modeling, Stored Procedures, Query Optimization

Development & Delivery: Git, GitLab, SourceTree, Testing, Debugging, Production Support

Analytics: Tableau, Power BI (learning/development)

PROFESSIONAL EXPERIENCE

Software Engineer - AI Systems

Apr 2026 – Present

Uni-President Information Philippines Corporation

Develop AI-enabled enterprise applications and intelligent system capabilities using React, Vue, TypeScript, REST APIs, and streaming APIs in collaboration with developers, QA engineers, and product managers.

- Develop an AI Assistant platform supporting conversational interactions, streaming responses, model selection, personas, file attachments, workspace integration, and CMS connectivity.
- Develop capabilities for an AI-powered multi-agent system, including agent configuration, sub-agent workflows, file handling, and interactive workflow features.
- Integrate AI application interfaces with REST and streaming APIs, handling request payloads, sessions, validation, errors, and application state.
- Implement configurable AI capabilities involving tools, skills, files, memory, and external service integrations.
- Develop knowledge-management capabilities supporting files, folders, permissions, search, filtering, and external connections.
- Troubleshoot AI and API integration issues, race conditions, application-state problems, and production defects.
- Collaborate across engineering and QA through requirements analysis, code reviews, testing, debugging, and feature validation.

PROFESSIONAL EXPERIENCE

Software Developer – Business System & Automation

Jan 2022 – Apr 2026

Brother Industries (Philippines) Inc.

Designed and implemented enterprise applications and automation solutions that streamlined manufacturing operations, approvals, reporting, notifications, and data-processing workflows.

- Built business-process automations using Microsoft Power Automate, Power Apps, Dataverse, and RPA tools.
- Developed automated approval workflows integrating business rules, role-based access, notifications, operational data, and audit processes.
- Automated repetitive Excel extraction and system-upload activities using RPA tools, reducing manual user work.
- Developed API- and database-driven enterprise applications using C#, ASP.NET Core, SQL Server, PostgreSQL, and related technologies.
- Built the Parts Control System, supporting parts tracking, quality monitoring, multilevel approvals, file management, transaction history, automated notifications, and reporting.
- Developed the Man-Hour Management System, automating operational data processing, approval workflows, notifications, Excel processing, SQL reporting, and Tableau analytics.
- Developed business systems supporting reservations, logistics, warehouse operations, shipping documentation, inventory, reporting, and administrative workflows.
- Designed and optimized SQL Server stored procedures, views, relational structures, and complex queries supporting operational automation.
- Gathered requirements directly from business users and translated manual processes and operational requirements into maintainable technical solutions.
- Supported testing, deployment, troubleshooting, enhancements, and production systems throughout the software development lifecycle.

SELECTED AI & AUTOMATION PROJECTS

Employee Onboarding Automation — n8n

- Built an end-to-end employee onboarding workflow using n8n and Google Workspace.
- Automated employee-data processing, validation, department-based routing, and email notifications.
- Designed workflow logic to reduce repetitive administrative tasks and support consistent onboarding processes.

IT Asset Request & Approval — Power Apps / Power Automate / SharePoint

- Built an automated asset-request and approval solution with request tracking, approval routing, notifications, and status management.
- Developed dashboards for monitoring pending, approved, and rejected requests.

Employee Leave Management — Power Apps / Power Automate / Dataverse

- Developed a leave-management application with automated manager approvals, status tracking, notifications, and dashboard reporting.

Armando's Furniture Business System — Python / FastAPI / React

- Developed a full-stack business system supporting demand forecasting, production optimization, resource management, and AI-assisted forecast analysis.
- Built FastAPI services and integrated business data into operational dashboards and optimization workflows.

EDUCATION

Bachelor of Science in Industrial Technology, Major in Computer Technology

Southern Luzon State University | 2014 – 2018
