

# ARVIN M. CAPARROS

SOFTWARE ENGINEER | .NET / ASP.NET CORE | SQL SERVER | REACT

Santo Tomas, Batangas, Philippines | 0963-016-8963 | arvinmcaparros@gmail.com | linkedin.com/in/arvin-caparros  
Portfolio: arvincaparros-portfolio.vercel.app

## PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience developing and maintaining enterprise web and desktop applications using C#, .NET/ASP.NET Core, SQL Server, React, Vue, and TypeScript. Experienced in backend and API integration, database-driven business systems, SQL optimization, production support, and workflow automation. Hands-on experience building enterprise applications across the software development lifecycle, translating business requirements into reliable technical solutions, and integrating modern AI-enabled application capabilities.

## TECHNICAL SKILLS

**Backend & Application Development:** C#, .NET / ASP.NET Core, MVC, WinForms, Entity Framework Core, REST APIs

**Frontend:** React.js, Vue.js, TypeScript, JavaScript, HTML, CSS, Bootstrap

**Databases:** SQL Server, PostgreSQL, MySQL, Stored Procedures, Views, Query Optimization

**APIs & Integration:** REST APIs, Streaming APIs, JSON, Swagger, Postman

**Development & Tools:** Git, GitLab, SourceTree, Docker, Testing, Debugging, Production Support

**Additional:** FastAPI, Python (working knowledge), RPA Tools, Tableau, AI-assisted development workflows

## PROFESSIONAL EXPERIENCE

**Software Engineer**

**Apr 2026 – Present**

**Uni-President Information Philippines Corporation**

Contribute to the development and maintenance of an AI-powered enterprise business platform using React, Vue, TypeScript, REST APIs, and streaming APIs in collaboration with developers, QA engineers, and product managers.

- Develop and maintain frontend application features for an AI Assistant module, including conversational UI, conversation management, streaming responses, model and persona selection, file attachments, workspace integration, and CMS connectivity.
- Enhance an AI-powered multi-agent platform with agent configuration, sub-agent workflows, file uploads, and interactive workflow features.
- Build Vue-based knowledge-management interfaces supporting file management, folder navigation, role-based permissions, search, filtering, and external connection management.
- Integrate application features with REST and streaming APIs, coordinating payload, session, validation, and error-handling requirements with backend developers.
- Investigate and resolve production defects, race conditions, API-integration issues, and application state-management problems.
- Support delivery through requirements clarification, code reviews, testing, debugging, and feature validation with cross-functional teams.

## PROFESSIONAL EXPERIENCE

---

### Full Stack .NET Developer

Jan 2022 – Apr 2026

#### Brother Industries (Philippines) Inc.

Developed and maintained enterprise web and desktop applications that automated manufacturing operations, approval workflows, reporting, and data management using C#, ASP.NET Core, SQL Server, PostgreSQL, and related technologies.

#### Selected Projects

- Japanese Meal Reservation System — Developed an ASP.NET Core MVC application for employee reservations, advance and bulk booking, menu administration, order monitoring, monthly reporting, and PostgreSQL/SQL Server data integration.
- Parts Control System — Built an ASP.NET Core MVC solution supporting parts tracking, quality-control monitoring, multilevel approvals, file management, transaction history, automated email notifications, and operational reporting.
- Man-Hour Management System — Developed a C# WinForms application for man-hour loss and COPQ management with role-based approvals, automated notifications, Excel processing, SQL Server reporting, and Tableau analytics.
- Container Management System — Developed C# WinForms and ASP.NET Core modules supporting container movement, logistics statuses, warehouse inventory, shipping documents, finished-goods planning, and SQL Server reporting.

#### Additional Contributions

- Designed and optimized SQL Server stored procedures, views, and complex queries to improve reporting performance and data reliability.
- Automated manual Excel extraction and system-upload workflows using RPA tools and implemented approval workflows, role-based access, notifications, and audit trails.
- Gathered requirements from business users and translated operational needs into maintainable technical solutions.
- Supported application testing, production deployment, enhancement releases, troubleshooting, and ongoing production support.

## SIDE PROJECTS

---

### Laurel Medical District Hospital Queuing System | Part-Time

- Developed an ASP.NET Core (C#) patient queuing and ticketing system covering queue management, ticket generation, and doctor assignment for outpatient consultations.

### Armando's Furniture Business System | Part-Time

- Developed a full-stack business system for production optimization, demand forecasting, resource management, and AI-assisted forecast analysis using FastAPI and React.

## EDUCATION

---

### Bachelor of Science in Industrial Technology, Major in Computer Technology

Southern Luzon State University | 2014 – 2018
