Santo Tomas, Batangas, Philippines | 0963-016-8963 | arvinmcaparros@gmail.com | [linkedin.com/in/arvin-caparros](https://www.linkedin.com/in/arvin-caparros)

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience delivering desktop and enterprise web applications across the full development lifecycle. Skilled in C#, .NET/ASP.NET Core, SQL Server, React.js, and Vue.js, with hands-on experience contributing to an AI-powered multi-agent platform, building Power Automate workflows to streamline business approvals, and applying AI-assisted development tools to accelerate delivery. Proven track record automating business processes, optimizing database performance, and taking end-to-end ownership of features to ship reliable, user-focused software. Seeking a Software Engineer role where I can apply full-stack, Power Platform, and AI-tooling experience to build scalable products.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL, HTML, CSS, PHP (working knowledge)

Frameworks: ASP.NET Core, MVC, WinForms, React.js, Vue.js

Databases: SQL Server, PostgreSQL, MySQL

Automation & Power Platform: Power Automate, Power Apps, RPA Tools, n8n (workflow automation)

Tools & Platforms: Git, GitLab, SourceTree, Postman, Swagger, Tableau (BI & Analytics), REST APIs, Bootstrap, WordPress

AI Tools: Claude Code, OpenAI Codex, AI-assisted development workflows

PROFESSIONAL EXPERIENCE

Software Engineer

April 2026 – Present

Uni-President Information Philippines Corporation

- Own features end-to-end — from requirements and design through implementation, testing, and deployment — for an AI-powered multi-agent platform that lets users create specialized AI assistants for different business use cases.
- Develop and maintain modern frontend applications using React.js and Vue.js, building responsive user interfaces that integrate seamlessly with backend APIs.
- Resolve production issues, bug fixes, and enhancement requests, maintaining application stability and reliability for end users.
- Partner with backend developers, QA engineers, and product managers throughout the development cycle, participating in code reviews and testing to uphold code quality and performance standards.

Full Stack .NET Developer

January 2022 – April 2026

Brother Industries (Philippines) Inc.

- Designed, developed, and maintained Windows-based internal systems using C# and WinForms to support cross-functional business operations.
- Built and enhanced internal web applications with ASP.NET Core (MVC & Razor Pages), prioritizing scalability, performance, and long-term maintainability.
- Developed and optimized SQL Server stored procedures, views, and complex queries, improving reporting speed and data reliability for downstream teams.
- Built Tableau dashboards integrated with SQL Server and PostgreSQL, delivering actionable insights to management and operations teams.
- Built a Power Automate flow that automatically emails managers when approval requests are pending, and implemented real-time status tracking, cutting turnaround time on internal approval processes.
- Applied RPA tools to automate manual workflows — extracting and processing data from Excel files and uploading it directly into internal systems — reducing repetitive manual work.
- Gathered requirements directly from end users, deployed enhancements, troubleshoot production issues, and provided ongoing application support.
- Adopted AI-assisted development tools to improve coding productivity, code quality, and overall solution design efficiency.

Graphic Designer

March 2021 – September 2021

Arneth Agri-organics Inc.

- Produced visual content and marketing collateral to support brand and product communications.

EDUCATION

Bachelor of Science in Industrial Technology, Major in Computer Technology | Southern Luzon State University | 2014 – 2018
